

My Name Is:
***JOLENE**

ALISON FRASER

I am a spayed brown & tricolor pit bull. My friends at the shelter think I am about 2 years and 5 months old. I came to the shelter on 8/16/2015.

Hello, my name is Jolene. I am a spunky two year old girl who absolutely loves people! I am filled with glee when I go on walks, I already know "sit", and I am working on basic manners. I am extremely treat-motivated, which helps with training. I have a show-stopping face with a happy, energetic tail, and I will win you over with my positive attitude. I am dog-friendly and I can live with kids and a dog-savvy cat. I am ready for a family who has tons of love to share. Come check me out at the shelter today.

M15-283696 2/2/2015 adouglas

WHEN I ARRIVED THE R/P WAS STILL ON SCENE IN HER VEHICLE AND THE DOG WAS NEARBY. THERE WAS A NEW 40LB BAG OF DOG FOOD IN FRONT OF A SHED, WHICH WAS OPEN AND SPILLED OUT. DOG APPEARED SKITTISH AT FIRST BUT WHEN I APPROACHED IT WITH A LEASH IT BECAME AGGRESSIVE AND CHARGED TOWARDS ME. I DEPLOYED MY BATON AND THE DOG STOPPED ADVANCING BUT BEGAN CIRCLING ME. THE DOG WOULD KEEP ITS DISTANCE AS LONG AS I MAINTAINED EYE CONTACT AND DOMINANT POSTURE WITH IT, BUT AS SOON AS I TURNED IT WOULD BEGIN FLANKING ME, BARKING THE ENTIRE TIME. I SPENT SOME TIME ATTEMPTING TO SECURE IT ON A CATCH POLE, BUT THE DOG WOULD BACK OFF AS SOON AS THE CATCH POLE GOT NEAR ITS HEAD. IT WOULD CONTINUOUSLY DART IN AND FLANK ME IF I EASED UP PRESSURE ON IT SLIGHTLY. AFTER 30 MINUTES OF ATTEMPTING TO SECURE IT, I WAS CONTACTED 509 AND REQUESTED HE RESPOND TO ASSIST WITH MORE ATTEMPTS. I CONTINUED TO APPROACH AND RETREAT FROM THE DOG, BUT THE DEMEANOR OF THE DOG NEVER CHANGED. WHEN 509 ARRIVED, THE DOG CEASED FLANKING, BUT WE WERE STILL UNABLE TO SECURE IT IN THE LARGE OPEN AREA. -527

M15-283725 2/3/2015 adouglas

520, 502, 513 AND MYSELF ARRIVED AND LOCATED THE DOG IN THE SAME AREA. DOG'S BEHAVIOR WAS THE SAME AS LAST NIGHT. 513 AND 520 WERE POSITIONED IN THE DRIVEWAY AREA WITH CATCH POLES, 502 WAS BETWEEN THEM WITH THE NET GUN, AND I WAS AT THE REAR OF THE BUILDINGS. 502 DEPLOYED THE NET GUN SUCCESSFULLY AND THE DOG IMMEDIATELY FLED SOUTH DIRECTLY TOWARDS ME. IT STOPPED TO BITE AT THE NET AND I WAS ABLE TO SECURE ITS FRONT LEFT PAW IN MY CATCH POLE AS IT WENT OVER A 4 FOOT RETAINING WALL LEADING TO THE VINEYARD BELOW. 513 IMMEDIATELY SECURED IT PROPERLY WITH A SECOND CATCH POLE AND I REPOSITIONED MY CATCH POLE PROPERLY ON THE NECK, OVER THE OTHER ONE. THE DOG WAS BITING AT THE CATCH POLES BUT IT DID NOT URINATE OR DEFECATE. THE DOG BEGAN BLEEDING FROM APPARENT SUPERFICIAL WOUNDS IN THE MOUTH, PRESUMABLE FROM BITING ITS TONGUE WHILE ATTACKING THE CATCH POLES. DOG SECURED IN MY TRUCK USING THE RAMP WITH NO ISSUE. -527

M15-285400	17-Feb-2015	BEHAVIOR	2/17/15 - I said hello to this dog thru the kennel fence, and she pressed her body against the fence, wanting me to pet her. She was wagging her tail with a friendly expression. I spent a few minutes petting her, and she acted very friendly and submissive. 556
M15-285639	23-Feb-2015	BEHAVIOR	Ok to move to adoption per Brian Whipple 565. AJ 563
M15-285884	25-Feb-2015	WEB	Hello, my name is Jolene. I am a spunky two year old girl who absolutely loves people! I am filled with glee when I go on walks, I already know "sit", and I am working on basic manners. I am extremely treat-motivated, which helps with training. I have a show-stopping face with a happy, energetic tail, and I will win you over with my positive attitude. I am dog-friendly and I can live with kids and a dog-savvy cat. I am ready for a family who has tons of love to share. Come check me out at the shelter today.
M15-287885	13-Mar-2015	INTERPARTY	3-13-15 I was walking by back of kennels this morning going to CA03 and saw Jolene hanging by her collar on fencing. I immediately call for help at which time 554 came to assist. 554 lifted dog from hindquarters as I unhooked collar from fencing. 537
M15-287882	13-Mar-2015	BEHAVIOR	I was talking with 554 about the Jolene this morning. she stated that she was choking this morning. I went to take a look at her with 554. Jolene approached the front of the kennel eyes blown tail tucked and growling at me. she would follow my every move never taking her eyes off of me while growling. 554 would tell her no and she would change her disposition with her. However as soon as I would approach she would growl at me. (502)
M15-289780	27-Mar-2015	BEHAVIOR	<p>3/26/15 I walked through the adoptable kennels with Megan so she could see which dogs were showing aggression to me. As we came to Jolene's kennel she began barking with her eyes blown, she backed up as she was barking at us.</p> <p>3/27/15 While I was walking through the kennels this morning I passed by Jolene's kennel, she again began barking at me and her eyes were blown, this time she charged the front of the kennel. I tried to calm her down but she continued to charge her</p>

Memo #	Memo Date	Memo Type	Memo Details
			gate at me. She may not have retreated this time because Megan was not present.-518
M15-291578	11-Apr-2015	MEDICAL	<p>4/11/15-</p> <p>During my closing walk through, I noticed that Jolene is non-weight bearing on her right rear leg. Since it was close to closing, and we don't reopen to the public until Tuesday, I left her in her current kennel and put her on the vet list. I will also post signs for her not to be walked until she is evaluated by the vet.</p> <p>558</p>

M15-294789	11-May-2015	INTERPARTY	Spoke to Dr. Gurevitch's office and made an appointment for a consult and possible x-rays for May 21, 2015 at 3 pm. MA
M15-295423	17-May-2015	BEHAVIOR	<p>Did meet and greet with potential foster's (██████████) dog. Went well. They tried to play but we wouldn't let them because of Jolene's leg. They then settled into a relaxed and calm co-existence. I think that they will do well together. MA</p>
M15-295924	21-May-2015	ACTIVITY	5/13/15 I met with Selena regarding aggressive adoptable dogs, after we met I took her out to the kennels so she could see exactly what I was talking about. When we came up to Jolene's kennel, she immediately began barking, her eyes were dilated and she was growling at the front of the kennel. I could not get her to calm down. Selena witnessed her behavior.-518
M15-295936	21-May-2015	BEHAVIOR	<p>From: Cathy McCafferty Sent: Thursday, May 21, 2015 5:27 PM To: Brian Whipple Cc: Cathy McCafferty</p>

Memo #	Memo Date	Memo Type	Memo Details
			<p>Subject: Jolene A316418</p> <p>Hi Brian,</p> <p>I wanted to let you know of a situation that I thought was concerning. I walked up to dispatch and Shirley, Megan and two volunteers were sitting on the floor at the opening to dispatch with the dog Jolene sitting in the middle of the group. The volunteers were letting her lick their faces. As I've noted in Jolene's file, she has only shown me aggression in her kennel. Jolene watched me the entire time, her eyes began to dilate, all the while, everyone on the floor continued to pet her and have their faces very close to Jolene's. I told them to be careful because she, Jolene, doesn't like me and I didn't want anyone to get hurt. I then heard comments like, "oh she will never hurt anyone", "they can be much different out of the kennel", blowing off my warning.</p> <p>Any dog closely surrounded by four people in a small unfamiliar busy area can become nervous, fearful, and potentially bite to get out of the situation. Jolene has already shown aggression numerous times to me and others. Jolene also has a severe injury causing pain, Jolene could have easily bit because of the pain.</p> <p>The situation staff put volunteers and the dog in was very irresponsible.</p> <p>Cathy</p>
M15-295928	21-May-2015	MEDICAL	<p>Jolene had a consult with Dr. Gurevitch regarding her lameness in her rear right leg. He agreed with Dr. Famini that she definitely has a torn cruciate but the rest of the knee structure felt good. The other knee felt stable. He said she needed a TPLO surgery to repair the knee. I scheduled it for the earliest available, June 9th at 8 a.m. MA</p>
M15-296141	24-May-2015	BEHAVIOR	<p>5/21/15-After Jolene's (A316418) Veterinary consult, where the orthopedic surgeon commented on how much swelling is present in the knee, I brought her back through the office and stopped at dispatch for Officer Shirley Zindler to pet. Since Jolene immediately bellied up, Shirley crouched down on the floor, as did I. Shortly after, two Volunteers came by and began petting Jolene. In the meantime Cathy McCafferty walked behind the Volunteers and said "watch out, that dog doesn't like me." I said, "she's fine." No one else responded. Cathy McCafferty then commented, "well I don't want one of you to get your face ripped off." We all four just looked at each other stunned as nothing could be further from the truth of the situation. Also, we were in the opening of dispatch, not in the middle of traffic. MA</p>
M15-297211	03-Jun-2015	BEHAVIOR	<p>duplicate</p>
M15-297715	10-Jun-2015	INTERPARTY	<p>From: [REDACTED] Sent: Wednesday, June 10, 2015 8:59 AM To: Megan Alexander Subject: Jolene's surgery update</p> <p>Hi Megan,</p> <p>The vet called in the afternoon and said Jolene's surgery went well! He did find a couple of other things to report:</p> <ol style="list-style-type: none"> 1) She has hip dysplasia, her hip sockets are shallow. There's

Memo #	Memo Date	Memo Type	Memo Details
			<p>been some mild degenerative change. But he didn't feel it was unmanageable.</p> <p>2) He's readjusting one of the screws this morning but she will still come back home with me this afternoon.</p> <p>3) The other issue, which could be of concern is a lump he found in her left thigh. The lump is approximately 3 cm X 2 cm. It's deep in the muscle tissue so it could be scar tissue from an previous trauma. He aspirated the mass and will have it checked.</p> <p>I'll have additional information after I pick her up today. Catch you up later. I took a couple of vacation days so I can stay with her Thursday and Friday. And yes....I got a new bed for her. It's true, I'm a total sucker!</p> <p>Take care!</p> <p>██████████</p>
M15-299242	24-Jun-2015	INTERPARTY	I talked to Dr. McKenzie about Jolene's 1 week recheck. She also needs to do a medical boarding this week from Friday to Monday afternoon. Dr. McKenzie said that it was okay for her to be dropped off after 10 am and before 3 pm. MA
M15-303747	05-Aug-2015	MEDICAL	<p>8/2/15-██████████ telephoned me saying that she had to take Jolene to Petcare because she had come into contact with something that she had a severe reaction to today. She had tried to reach me but I was at work and didn't hear the phone so she followed the foster manual guidelines and contacted the sheriff and finally just decided that she needed to go to the emergency vet. The first visit they simply perscribed benadryl then Jolene's face swelled significantly so ██████████ returned to the Vet and they gave her a steroid injection.</p> <p>8/4/15-██████████ texted me and then called me at 8:43 pm (after contacting the Sheriff and an ACO) and said Jolene had hives on her chest. She said that the ACO had authorized her to take her to the Vet. I asked how much benadryl she had given and it was on the lowest end of the range so I advised to give an additional one and wait since there was no swelling to her face. It could wait until tomorrow when our Vet was in. Jolene did fine overnight and she has continued her on benadryl for now. 570</p>
M15-305510	22-Aug-2015	BEHAVIOR	8/22/15 Walking through kennels this morning, after dogs had been fed and cleaned, Joelene's eyes were dilated, she was barking and growling at me. This behavior continues even after being in a foster home for an extended period of time.-518
M15-307015	05-Sep-2015	BEHAVIOR	<p>9/5/15 Jolene continues to show aggression, not only to me, but to several other staff members. Jolene initially showed aggression in the field when the officers tried to catch her. Regardless of numerous aggressive behavior memos this dog is available for adoption. Today again, Jolene had dilated eyes, barking and growling at me.</p> <p>On 8/28/15 I walked Marcia Chadbourne and Heidi Fowers from RISK through the kennels to show them staffs concerns with aggressive dogs being made available for adoption. I showed them Jolene whose eyes were dilated she was barking and trying to bite my hand through the kennel.</p> <p>Later the same day I walked OSHA through the kennels and when we came to Jolene's kennel she was standing in the guillotine doorway curling her lips and growling.</p>

Memo #	Memo Date	Memo Type	Memo Details
M15-307311	08-Sep-2015	INTERPARTY	<p>I emailed Brian regarding this dogs behavior.-518</p> <p>From: Megan Alexander Sent: Tuesday, September 08, 2015 5:52 PM To: [REDACTED] Cc: Brian Whipple Subject: Jolene A316418 follow up appointment</p> <p>Hi guys,</p> <p>Jolene had a re-check appointment with Dr. Gurevitch for x-rays today that was scheduled before she came back to the shelter by her Foster Mom. Dr. Gurevitch's office called to reschedule today because their x-ray machine is broken. I rescheduled her appointment for September 29th, at 2 pm.</p> <p>Please let me know if you would like this changed or have other treatment plans for her.</p> <p>Megan Alexander, Behavior Program Coordinator</p>
M15-308282	17-Sep-2015	ACTIVITY	9/17/15 Jolene continues to show aggression in her kennel, eyes dilated, growling, hackles up.-518
M15-308985	24-Sep-2015	BEHAVIOR	9/24/15 at 1410 hrs I was parked at the Sally Port, I went to walk around the back of my truck and a volunteer was walking Jolene. Jolene saw me and began to bark with her eyes dilated, the volunteer just calmly told Jolene to stop it. Jolene did not stop until I was out of view. -518
M15-309205	26-Sep-2015	BEHAVIOR	9/26/15 I took 502 out to the kennels to see how this dog reacted to him. As soon as Jolene saw us coming her body stiffened she began barking and growling, her eyes were dilated. 502 tried to get Jolene to calm down but she kept her stance and would not stop barking and growling, even when 502 was at the side of her kennel where she couldn't see his uniform. I informed 502 while we were out there that this was the dog he and several other officers had to go out and capture because she was aggressive in the field. 502 was shocked that this dog was up for adoption.-518

Hydration - N

Eyes - N -

Ears - N

Nares - N

Mouth - N -

Lymph Nodes - N

Cardiovascular - N - HR~ 118 bpm, Rhythm reg, no murmur

Lower Respiratory Tract - N - RR WNL, lung sounds clear

Upper Respiratory Tract - N - No cough on tracheal squeeze, sounds clear.

Abdo - N - Tense but not painful, no palp mass/organomegally/free fluid

Genitourinary - N - FS

Musculoskeletal - N - Ambulatory all 4 limbs, good weight bearing on RH now, however stiff on palpation of stifle and large fluid pocket palpable on the cranial medial aspect of the right stifle. ~30ml serous fluid aspirated from this pocket. Suture knot has also surfaced at the proximal end of the skin incision, left in place for now. Further suture found surfaced over the medial hock, extracted.

Skin - N - No evidence of ectop/infl. Fentanyl patch site on left caudal metatarsal region appears to be healing well. Skin incisions otherwise appear to be holding well.

Other -

A: Right TPLO surgery site with moderate seroma - possible cause, overactivity, suture material reaction, infection, other
Otherwise appears to be doing well post op.

P: Continue all meds as previously prescribed by Dr Gurevitch, with the extension of the Keflex for a further week.

Rx: Keflex 500mg 1 PO BID 7 days

The Acepromazine dose may also be increased to 37.5mg every 8 hours as required for sedation.

Strict rest a further 7 days

Recheck exam in 7 days or sooner if further CS arise.
