 ■■■ PINTO DR **Report Date:** 08/27/2017
 LAKE WORTH, FL 33467 **Activity No.** A17-010638
 3714653 **Body Location:** FULL BODY

Incident Location: ■■■ PINTO DRIVE, LW 33467

8/28/17 - I have spoken with Doug Jenkins from the PBC Medical Examiners Office. I advised that both dogs have been euthanized and that we are prepared to assist with anything they need. He stated that he had consulted Dr. Bell, the Chief Medical Examiner, and advised that they do not require anything further from our agency or from the bodies of these dogs. He explained that since both dogs are now deceased and there is no criminal element to this investigation, neither molds of their bite pattern nor additional DNA samples will be necessary. He advised that if the cause of death is determined to be from animal bites, it will be assumed that it was one or both of these dogs who were involved, since there were no other animals and the property was securely fenced. Therefore it is now ok to proceed with rabies testing for both dogs and ok to dispose of the bodies of both dogs. Capt. Walesky

8.30.17-Dog sent to state lab for rabies testing. M. O'Roark#2119

8.31.17-I received results from the state lab that this dog tested negative for rabies. M. O'Roark#2119
